

MERMAN

FIREFIGHTER OUTFIT STORAGE BAG

The MERMAN Firefighter Outfit Storage Bag provides a practical storage solution for firefighter protective clothing on board vessels. The bag features one large main compartment designed to store a complete firefighting outfit, ensuring that equipment remains organised, protected, and ready for immediate use during emergency situations.

Manufactured from durable heavy duty fabric, the bag is designed to withstand demanding maritime environments while protecting the contents from dirt and mechanical wear. The spacious compartment allows storage of jacket, trousers, helmet, gloves and boots in one place.

Strong carrying handles allow easy transport and handling, while a transparent identification pocket enables quick labelling of the contents or assignment to specific fire stations or crew members.

SPECIFICATIONS

STANDARD SIZES: ONE SIZE

Application: Storage of firefighter protective equipment

Material: Heavy duty textile fabric

Colour: Red

Identification: Transparent document pocket

Handles: Reinforced carrying handles

Marking: MERMAN logo

Use: Marine firefighting equipment storage
